

How to make your own Elmer the elephant

Things you will need:

- Scissors
- Milk carton (any size)
- Tissue paper
- Glue
- Eyes

Start by cutting around the middle of the milk carton make sure you get an adult to help you.

Take the top half of your carton and remove the lid before cutting the handle in half to make the elephants trunk.

Cut out semi circles in the front back and sides of the milk carton to create the elephants legs.

Place some glue onto the milk carton then start sticking the pieces of tissue paper onto the Carton.

Once you have covered the elephant in tissue paper you can then add some ears and eyes and your elephant is now complete.

If you don't have any tissue paper at home then why not try and use some different materials like miss Kayleigh has done here to make your own Elmer the elephant as we would love to see all your fantastic creations.

Have fun!
