Remember!

Don't just practise your tables reciting 3, 6, 12, 15...
This will not help you to learn your multiplication facts!

Some suggestions for how you could practice:

- Ask someone at home or a friend to test you.
- Write the numbers 0-12 on separate squares of paper. Decide a multiplication table to practise, turn the numbers over 1-by-1 and see if you can quickly remember the multiplication fact.
- If you have the internet, search for times table games and learn online.
- Make sure you know all the different names for multiply and divide.
